ATM Transaction Simulation

B.Tech Python Programming – Activity-Based Learning

Python source code only. Save or copy the program into a .py file and run it with Python 3.

```
balance = 5000.0

while True:
    print("\n===== ATM MENU =====")
    print("1. Check balance")
    print("2. Deposit money")
    print("3. Withdraw money")
    print("4. Exit")

    choice = input("Enter your choice: ")

    if choice == "1":
        print(f"Available balance: Rs. {balance:.2f}")

    elif choice == "2":
        try:
            amount = float(input("Enter deposit amount: Rs. "))
            if amount > 0:
                balance += amount
                print("Deposit successful.")
                print(f"New balance: Rs. {balance:.2f}")
            else:
                print("Amount must be greater than zero.")
        except ValueError:
            print("Please enter a valid amount.")

    elif choice == "3":
        try:
            amount = float(input("Enter withdrawal amount: Rs. "))
            if amount <= 0:
                print("Amount must be greater than zero.")
            elif amount > balance:
                print("Insufficient balance.")
            else:
                balance -= amount
                print("Please collect your cash (simulation).")
                print(f"Remaining balance: Rs. {balance:.2f}")
        except ValueError:
            print("Please enter a valid amount.")

    elif choice == "4":
        print("Thank you for using the ATM simulation.")
        break

    else:
        print("Invalid choice. Select 1, 2, 3 or 4.")
```
